JUSTTRACK

HAMBURG, GERMANY

### Data Scientist (f/m/d)

Dear Hiring Manager,

- My personal project that I am proud of is the neuro-comma - neural network solution for the repunctuation task for the Russian language. After spending some time on research I found that there is no high-quality open-sourced solution for such a task, so I said: "Fine, I'll do it myself". Russian NLP community appreciated my contribution, even though my colleagues said that they used my model for some hackathon before we became colleagues.
- Desired salary - at least 72k EUR gross, annual
- Earliest possible start date - that depends on relocation time, but I want to join your team as fast as I can!

Sincerely,

**Vladislav Sobolev**
